COMMANDO LOCK

Commando Lock's mission is to manufacture a better American made padlock, more secure, easier to use and of the highest quality.

Our military-grade padlocks have been used by the U.S. Armed Forces worldwide. Since 2012 we have worked with the Locksport community (expert lock pickers) to improve the security of Commando Locks. Our padlocks are known as some of the most secure consumer locks available.

Advanced Anti-Pick Technologies In All Padlocks

INTERLOCKED CONSTRUCTION

Each plate of a Commando Lock is interlocked to the next plate by 200,000 lbs. of controlled pressure in our process called the Commando Method. The plates are precisely oriented creating the most accurately assembled lock body.

Open and close a Commando Lock and you'll feel the difference. They don't just look better, Commando Locks are among the strongest laminated padlock assemblies in the world.

Premium Weather Resistance ♦ Lifetime Guarantee

iCHANGE™ - PATENTED VERSATILITY

Quickly swap from a standard shackle to a long shackle or cable – and back – in seconds, with no tools required! This enables you to use one lock for a wide range of applications. Changing shackles is as simple as a turn of the key to release the shackle and another turn to secure the new one. This flexibility comes without sacrificing strength or security. The iCHANGE lock is the most versatile security tool in the industry.

4 Locks in 1

Total Guard iChange

Tactical Shrouded Padlock Cut Proofing

Four full sides of shackle protection make this the strongest lock in its size with 25% more shackle coverage than any other shrouded padlock.
